

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-19: (Canceled)

20. (Currently amended) A method of receiving compensation for a security system for protecting content distributed over a computer network comprising:

selling a server security program to a content provider; and

selling a plurality of copies of a limited-use client program to the content provider for licensing to users wishing to access the content;

wherein the server security program distributes the content to a client system if the client system has a the limited-use client program and wherein the limited-use client program is a web browser program configured to ~~limit, in at least one way,~~ disable non-ephemeral reproduction functions of the web browser program ~~of the content~~ while the distributed content is detected as being displayed by the ~~limited-use client~~ web browser program at the client system.

21. (Original) The method of claim 20, wherein the compensation is received at least from one of (a) when the server security program is executed by the content provider and (b) when the content provider licenses one of the plurality of copies.

22. (Canceled)

23. (Original) The method of claim 20, wherein the compensation is based on advertising revenue obtained by the content provider based on advertising in connection with a user accessing content protected by the security system.

Claims 24 - 83: (Canceled)

84. (Currently amended) A method of receiving compensation for distributing protected content over a computer network comprising:

(A) providing network accessible protected content from a source;
(B) authorizing downloading of protected content from a source to a client system;

(B1) providing an end-user at the client system with a web browser program configured to disable non-ephemeral reproduction functions of the web browser program while the protected content is detected as being displayed by the web browser program at the client system; and

(C) preventing, ~~in at least one way and~~ until compensation is received, non-ephemeral reproduction of the downloaded content, while the downloaded content is being displayed at the client system.

85. (Currently amended) In a computer program product for use with a computer system operatively connectable to a computer network and capable of distributing protected content over a computer network, the computer program product comprising a computer useable medium having embodied therein program code comprising:

(A) program code for providing network accessible protected content from a source;

(B) program code for authorizing downloading of protected content from a source to a client system;

(B1) program code for a web browser program configured to disable non-ephemeral reproduction functions of the web browser program while the distributed content is detected as being displayed by the web browser program at the client system; and

(C) program code for preventing, ~~in at least one way and~~ until compensation is received, non-ephemeral reproduction of the downloaded content while the downloaded content is being displayed by the client system.

86. Canceled

87. (Currently amended) The method as recited in ~~claim 86~~claim 20, further comprising:

the server security program distributing authorization information along with the content,

wherein the web browser ~~limits~~disables the non-ephemeral reproduction of the distributed content as a function of the authorization information.

Claims 88 - 91. Canceled

92. (new) The method of claim 20, wherein:

the web browser program is configured to disable non-ephemeral reproduction of the content by at least one of: window subclassing, clipboard flushing, disabling a browser function, source code encryption, user level encryption, securing cache content, and device context monitoring.
